What Is Wrong With Electricity Corporation ?

Dear Sirs:

Will you please allow me a suitable space in your widely read journal to make some observations on the Electricity Corporation of Nigeria. The first article in the Electricity Corporation Department.

Previously permits were issued out to the contractors a fortnight after the applications were sent, even during the war it did not take more time than a month. But recently the time has been increased to two months by the P.D.D. known as Lagos Electricity Undertakings but since the Corporation had taken over things have taken other shape.

May I ask the Chief Electrical Engineer to look into these herein.

An application sent to that department by the Electrical Contractors will now take about two months or more before permits are being issued out to them. The result of this is that the Electrical Engineers actors critical, and allowing all sorts of insinuations against them from electric consumers.

I am therefore appealing to the Electrical Engineers to rectify the departmental error as it is this imposture to the satisfaction of the public who finance the department.

A quick in time saves nine, for the sake of efficiency let the Electrical Engineers in this act at once.

As Applicant,
LAGOS.
